One Year	28.8%	-2.3%	-7.0%	Crescat's flagship cross-asset hedge fund strives to capitalize on macro themes globally across all major liquid asset classes including large- and mid-cap equities, commodities, currencies, and fixed income.
Three Year	-2.9%	14.0%	2.1%	
Five Year	4.3%	11.0%	-0.1%	
Since Inception	11.7%	8.3%	0.3%	
Historical Data - Since Inception	CGM	S&P 500	HFRX	Firm Mission and Investment
Cumulative Return	327.8%	185.2%	4.1%	Crescat Capital is a global macro asset management firm. Our mission is to grow and protect wealth by capitalizing on the most compelling macro themes of our time. We aim for high absolute and risk-adjusted returns over the long term with low correlation to benchmarks. Crescat's edge is our ability to develop and profit from the themes that arise from our proprietary, value-driven equity and macro models. By discerning the richer macro narratives behind the securities recommended by our models, we believe we have an advantage over other quantitative managers. At the same time, by deploying both systematic models and global macro themes, we believe we have a leg up on traditional value managers.

### Important Disclosures

Crescat Capital LLC manages hedge funds and separate accounts through its wholly owned subsidiary, Crescat Portfolio Management LLC, an investment adviser registered with the U.S. Securities and Exchange Commission. Registration as an investment adviser does not imply a certain level of skill or training.

Crescat Portfolio Management claims compliance with **Global Investment Performance Standards (GIPS®)**. Prospective clients can obtain a compliant presentation and the firm's list of composite descriptions by contacting Crescat by phone at (303) 271-9997, or by visiting our website at [www.crescat.net/resources/duediligence/](http://www.crescat.net/resources/duediligence/). "Crescat Global Macro" in this report refers to the Crescat Global Macro Hedge Fund Composite. Returns are presented net of management fees and performance fees. The currency used to express performance is U.S. dollars.

### Strategy and Composite Description

The **Crescat Global Macro Hedge Fund Composite** includes all accounts that are managed according to the firm's global macro hedge fund strategy over which the manager has full discretion. Net performance is calculated based upon an unrestricted, full fee paying investor who came in at inception. Investment results shown are for taxable and tax-exempt accounts and include the reinvestment of all earnings. Any possible tax liabilities incurred by the taxable accounts have not been reflected in the net performance. Performance results are time-weighted net of trading commissions and other transaction costs including non-recoverable withholding taxes. An individual limited partner's results may vary due to the timing of capital transactions, high watermarks, and performance. This hedge fund strategy has a broad and flexible mandate. Fund investing involves risks, including possible loss of principal. Short sales by a fund involve loss potential since the market price of securities sold short may continuously increase. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover and increased brokerage costs. The funds may use a moderate amount of leverage which could result in greater losses than if the funds were not leveraged. The strategy strives to grow and protect client capital through an actively-managed, prudently-diversified, multi-asset-class portfolio of liquid global securities. The manager follows a multi-disciplinary, value-based investment process with risk controls. The strategy blends top-down, macroeconomic analysis with bottom-up, fundamental valuation. The investment team's macroeconomic analysis includes the valuation of currencies, commodities, industries, and markets in order to develop global macroeconomic themes that guide positions and exposures. Various economic influences can have a big effect on investment returns. For example, the performance of the Crescat hedge funds and large cap strategy was negatively impacted by the Global Financial Crisis. The largest asset class exposure is large- and mid-cap global equities, long and short, with a long bias. The manager trades and invests in individual equities as well as exchange-traded funds and related options. The manager also takes long and short positions in currencies, commodities and fixed income securities primarily through liquid, exchange-listed futures and options contracts. The manager may take limited positions in over-the-counter derivatives. The strategy employs a moderate amount of leverage within constraints based on the investment team's assessment of market risks and opportunities. The strategy's bottom-up approach to equity valuation starts with a proprietary, fundamental, quantitative model that was originally built in 1997 by the firm's Chief Investment Officer, Kevin C. Smith, CFA. The model applies an innovative and robust discounted-free-cash-flow methodology to produce daily valuations of the top 2,000 largest and most-liquid global equities that trade on a U.S. exchange. The fundamental quant model has been consistently refined and applied to managing this strategy since its inception. The investment team performs additional qualitative analysis to validate buy and sell signals generated by the model and to integrate model-driven ideas with the firm's macro themes. The goal of the strategy is to generate high risk-adjusted returns as measured by Alpha, Sortino Ratio, Omega Ratio, and Gain-Loss Ratio that are in the top 10% of all global hedge fund managers across diverse investment disciplines. The model fee used for performance posted above is representative of a full fee paying account that joined at the inception of the fund.

### Benchmarks

The **S&P 500 Index** is perhaps the most commonly followed stock market index. It is considered representative of the US stock market at large. It is a market-cap-weighted index of the 500 largest and most liquid companies listed on the NYSE and NASDAQ exchanges. While the companies are U.S. based, most of them have broad global operations. Therefore, the index is representative of the broad global economy. It is a suitable benchmark for the Crescat Global Macro Hedge Fund Composite which has also traded extensively in large, highly-liquid global equities through U.S.-listed securities.

The **HFRX Global Hedge Fund Index** represents a broad universe of hedge funds with the capability to trade a range of asset classes and investment strategies across the global securities markets. The index is weighted based on the distribution of assets in the global hedge fund industry. It is a trade-able index of actual hedge funds. It is a suitable benchmark for Crescat's Global Macro Hedge Fund Composite which has also traded in multiple asset classes and applied a multi-disciplinary investment process since inception.

Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The performance and volatility of the funds will be different than those of the indexes. One cannot invest directly in an index. Benchmarks are unmanaged and provided to represent the investment environment in existence during the time periods shown.

### Private Securities Offering Legend For Crescat Global Macro Fund LP and Crescat Long/Short Fund LP (hereafter "Crescat fund or Crescat funds")

- Only accredited investors and qualified clients will be admitted as limited partners to a Crescat fund. For natural persons, investors must meet SEC requirements including minimum annual income or net worth thresholds.
