Historical Data - Since Inception	CLCC	S&P 500	R1000	Firm Mission and Investment
Cumulative Return	1446.1%	787.8%	815.5%	Crescat is a global macro asset management firm. Our mission is to grow and protect wealth over the long term. We deploy tactical investment themes based on proprietary value-driven equity and macro models. Our goal is industry leading absolute and risk-adjusted returns over complete business cycles with low correlation to common benchmarks.
Cumulative VAMI	\$1,546	\$888	\$915

Important Disclosures

Crescat Capital LLC manages hedge funds and separate accounts through its wholly owned subsidiary, Crescat Portfolio Management LLC, an investment adviser registered with the U.S. Securities and Exchange Commission. Registration as an investment adviser does not imply a certain level of skill or training. Estimated returns may change upon finalization. Finalized returns are posted once available on our website here: <https://www.crescat.net/performance/>.

Performance figures shown have been restated and may differ from performance previously presented in Crescat materials for this strategy.

Crescat Portfolio Management claims compliance with **Global Investment Performance Standards (GIPS®)**. Prospective clients can obtain a GIPS-compliant presentation and the firm's list of composite descriptions by contacting Crescat by phone at (303) 271-9997, or by visiting our website at www.crescat.net/resources/due-diligence/. Returns are presented net of management fees. The currency used to express performance is U.S. dollars. Performance data represents past performance and is no guarantee of future results. **GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.**

Strategy and Composite Description

Past performance is not indicative of future results. The **Crescat Large Cap Composite** includes all accounts that are managed according to Crescat's large cap SMA strategy over which it has full discretion. Investment results shown are for taxable and tax-exempt accounts. Any possible tax liabilities incurred by the taxable accounts are not reflected in net performance. An actual client's results may vary due to the timing of capital transactions, high watermarks, and performance. Performance results are presented as net and are time weighted and reflect the deduction of advisory fees, brokerage commissions, and other expenses that a client would have paid, and includes the reinvestment of dividends and other earnings. Performance should not be considered indicative of the skill of Crescat, and clients may experience a loss. Past performance does not guarantee future results. Performance results are time-weighted net of trading commissions and other transaction costs including non-recoverable withholding taxes. The Large Cap SMA is a long-only equity strategy with a focus primarily on the 1,500 largest U.S. exchange-listed stocks and related ETFs. It can also hold a small percentage of non-U.S. exchange listed stocks and small cap stocks that, based on Crescat's analysis, have a high probability of becoming U.S. listed mid and large cap stocks. It does not employ leverage. The Large Cap strategy generally holds between twenty to fifty securities and may hold a significant cash position based on Crescat's overall macro views. Positioning is determined largely by Crescat's proprietary multi-factor macro and fundamental equity-quant models, which identify secular trends and individual opportunities. Positioning may be adjusted on a discretionary basis following both Crescat's macro thematic investment framework and its systematic stock scoring model.

Benchmarks

The **S&P 500 Index** is perhaps the most commonly followed stock market index. It is considered representative of the U.S. stock market at large. It is a market-cap-weighted index of the 500 largest and most liquid companies listed on the NYSE and NASDAQ exchanges. While the companies are U.S. based, most of them have broad global operations. Therefore, the index is representative of the broad global economy. It is a suitable benchmark for the Crescat Large Cap Composite Composite, because it has also traded and invested extensively in large, highly-liquid global equities through U.S.-listed securities since inception.

The **Russell 1000** is a market-cap weighted index of the 1,000 largest companies in US equity markets. It represents a broad scope of companies across all sectors of the economy. It is a commonly followed index among institutions. This index contains many of the same securities as the S&P 500 but is broader and includes some mid-cap companies. It is a suitable benchmark for Crescat Large Cap Composite which has predominantly held and traded similar securities since inception.

Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The performance and volatility of the SMA will be different than those of the indexes. One cannot invest directly in an index. Benchmarks are unmanaged and provided to represent the investment environment in existence during the time periods shown.
