Upside Capture	-	222.6%	26.8%
Downside Capture	-	90.3%	63.2%
Up/ Down Capture Ratio	-	2.5	0.4
Monthly Alpha	-	0.6%	0.7%
Annualized Alpha	-	7.4%	8.2%
Beta	-	0.94	0.35
Correlation	-	0.38	0.31

From Alpha to Omega: Why Risk-Adjusted Returns Matter

When it comes to measuring manager skill, Alpha is a time-tested favorite. Alpha measures a manager's excess returns over a benchmark, adjusted by how much market risk is taken (Beta). All else equal, a higher Alpha is achieved when a manager outperforms the benchmark while taking less market risk. Sortino Ratio and Omega Ratio are risk-adjusted return measures that have replaced the once-popular Sharpe Ratio since the Global Financial Crisis. These measures distinguish between investments that have a lower probability of extreme loss and a higher probability of gain, which the Sharpe Ratio may fail to uncover. The Omega Ratio contains the most information about the return distribution of a fund and its benchmark. For further information about these and other performance metrics, visit our website at www.crescat.net.

Firm and Strategy Information

Crescat Capital is a hedge fund management firm dedicated to identifying and capitalizing on global macroeconomic investment themes using a value-driven, quantitative and fundamental approach. The Crescat Long/Short Hedge Fund Composite is a long-biased equity hedge strategy consisting of predominantly large- and mid-cap, liquid global equities. The Long/Short Fund typically employs a moderate amount of leverage. The investment team adheres to portfolio construction and risk parameters designed to minimize risk with the goal of achieving risk-adjusted performance in the top 10% of global long/short equity hedge funds.

GIPS Compliance Statement

Returns are net of management fees and performance fees. Crescat Portfolio Management LLC claims compliance with GIPS®. See Page 2 for GIPS Disclosures.

Important Disclosures

Crescat Capital LLC manages hedge funds and separate accounts through its wholly owned subsidiary, Crescat Portfolio Management LLC, an investment adviser registered with the U.S. Securities and Exchange Commission. Registration as an investment adviser does not imply a certain level of skill or training.

Crescat Portfolio Management claims compliance with **Global Investment Performance Standards (GIPS®)**. Prospective clients can obtain a compliant presentation and the firm's list of composite descriptions by contacting Crescat by phone at (303) 271-9997, or by visiting our website at www.crescat.net/resources/due-diligence/. Returns are presented net of management fees and performance fees. The currency used to express performance is U.S. dollars.

Strategy and Composite Description

The Crescat Long/Short Hedge Fund Composite includes all accounts that are managed according to the firm's long/short equity hedge fund strategy over which the manager has full discretion. This hedge fund strategy strives to grow and protect client capital through an actively-managed, prudently-diversified, long-biased, long/short equity portfolio comprised of liquid large- and mid-cap global equities. The manager follows a multi-disciplinary, value-based investment process with risk controls. The strategy blends top-down, macroeconomic analysis with bottom-up, fundamental valuation. The investment team's macroeconomic analysis includes the valuation of currencies, commodities, industries, and markets in order to develop global macroeconomic investment themes that are expressed in the strategy through long and short equity positions. The manager may trade and invest in individual equities as well as exchange-traded funds and related options. The strategy employs a moderate amount of leverage within constraints based on the investment team's assessment of market risks and opportunities. The strategy's bottom-up approach to equity valuation starts with a proprietary, fundamental, quantitative model that was originally built in 1997 by the firm's Chief Investment Officer, Kevin C. Smith, CFA. The model applies an innovative and robust discounted-free-cash-flow methodology to produce daily valuations of the top 2,000 largest and most-liquid global equities that trade on a U.S. exchange. The fundamental quant model has been consistently refined and applied to managing this strategy since its inception. The investment team performs additional qualitative analysis to validate buy and sell signals generated by the model and to integrate model-driven ideas with the firm's macro themes. The goal of the strategy is to generate high risk-adjusted returns as measured by top-decile Alpha, Sortino Ratio, Omega Ratio, and Gain-Loss Ratio that are in the top 10% of all global hedge fund managers over the long term whose strategy is predominantly long/short equity.

Benchmark Descriptions

The **S&P 500 Index** is perhaps the most commonly followed stock market index. It is considered representative of the US stock market at large. It is a market-cap-weighted index of the 500 largest and most liquid companies listed on the NYSE and NASDAQ exchanges. While the companies are U.S. based, most of them have broad global operations. Therefore, the index is representative of the broad global economy. It is a suitable benchmark for the Crescat Long/Short Hedge Fund Composite which has also traded extensively in large, highly-liquid global equities through U.S.-listed securities.

The **HFRX Equity Hedge Index** represents an investable index of hedge funds that trade both long and short in global equity securities. Managers of funds in the index employ a wide variety of investment processes. They may be broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. It is a suitable benchmark for Crescat Long/Short Fund because it has also been predominantly composed of long and short global equities since inception.

Private Securities Offering Legend For Crescat Global Macro Fund LP and Crescat Long/Short Fund LP (Hereafter "Crescat fund or Crescat funds")

- Only accredited investors and qualified clients will be admitted as limited partners to a Crescat fund. For natural persons, investors must meet SEC requirements including minimum annual income or net worth thresholds.
